PROFESSIONAL SUMMARY

Technical Lead building open-source, enterprise-grade software in Go and C for Japanese clients. Active open-source contributor with 3+ years on Jobarranger, an enterprise job scheduling platform. Proven track record delivering 15+ major releases, resolving 300+ customer-reported bugs. Experienced in Continuous Integration/Continuous Deployment (CI/CD) automation (GitLab CI, GitHub Actions), containerization with Docker, PostgreSQL/MySQL, and cloud infrastructure on Google Cloud Platform (GCP) and Amazon Web Services (AWS).

TECHNICAL SKILLS

Languages: Go (3 yrs), C (3 yrs), Rust, Bash, Java

Databases: PostgreSQL, MySQL, MariaDB (3 yrs)

Frameworks: Gorilla, gRPC, Angular, Flutter

DevOps & CI/CD: Linux (4 yrs), Docker (3 yrs), GitLab CI (3 yrs), GitHub Actions

Tools: Git (5 yrs), Ansible

Cloud Platforms: GCP, AWS

WORK EXPERIENCE

Technical Lead | DAT (Daiwa Institute of Research) | Bangkok, Thailand (Remote) | 04/2025 – Present

- Lead release management across 15+ major and 20+ minor releases, including pipeline execution, unit testing, installer builds, and Docker image publishing.
- Architect and implement new features for Jobarranger, an open-source job scheduler actively used by enterprise Japanese clients.
- Conduct code reviews for 300+ pull requests, enforcing quality standards and mentoring 10 junior engineers.
- Design and automate CI/CD infrastructure for integration testing and deployment using GitLab CI and Docker.
- Resolve customer-reported performance issues, maintaining platform stability and client satisfaction across Japanese enterprise accounts.
- Produce detailed technical designs for new features aligned with client requirements.

Tech: Go, C, React, Bash, GitLab CI, Docker, PostgreSQL, MySQL, MariaDB, Linux

Software Engineer | DAT (Daiwa Institute of Research) | Yangon (Remote) | 02/2023 – 03/2025

- Resolved 300+ bugs and performance issues reported by enterprise Japanese clients, reducing ticket backlog and improving system reliability.
- Developed and extended features for Jobarranger open-source software to meet evolving client requirements.
- Built and maintained CI/CD pipelines for integration and unit testing, reducing manual QA effort.
- Provided accurate and timely responses to customer technical inquiries through a ticket system.

- Wrote and executed unit and integration test cases to ensure application reliability before each release.

Tech: *Go, C, React, Bash, GitLab CI, Docker, PostgreSQL, MySQL, MariaDB, Linux*

Cloud Engineer (Part-time) | Irralab | Bangkok, Thailand | 10/2024 – 01/2025

- Designed and implemented scalable GCP cloud infrastructure to support application deployment on Compute Engine and Cloud Run.
- Provisioned and managed cloud resources (compute, storage, networking) for backend services.
- Implemented CI/CD pipelines integrated with GCP infrastructure using Cloud Deploy and Artifact Registry.

Tech: *GCP Cloud Run, Cloud Deploy, Artifact Registry, Compute Engine, VPC Network, AWS*

Software Engineer Intern | Ace Inspiration | Yangon | 09/2022 – 01/2023

- Developed and enhanced internal business applications, including bug fixes, feature improvements, and documentation.
- Performed unit and integration testing to ensure software quality prior to release.

Tech: *Java, Spring Boot, Angular, MySQL*

PROJECTS

Jobarranger | Open-Source Job Scheduler

- Enterprise-grade job scheduling software deployed by multiple Japanese enterprise clients.
- Core contributor for 3+ years; delivered 15+ major releases and resolved 300+ reported issues.
- Built in Go and C with Docker containerization, PostgreSQL/MySQL backend, and GitLab CI automation.

Jobarranger Automatic Integration Testing Tool

- CLI-based integration testing framework built in Go to automate end-to-end validation of Jobarranger job scheduling workflows across Linux and Windows environments.
- Supports PostgreSQL and MySQL backends with configurable connection flags; executes targeted or full ticket-based test suites with per-testcase granularity and custom timeouts.

Jobarranger RPM Package Build Tool

- Automated RPM package generation tool for Jobarranger, targeting RHEL/CentOS distributions (EL7, EL8, EL9).
- Shell-scripted Docker-based build pipeline that compiles source and produces distributable .rpm files with a single versioned command, supporting multi-distro release workflows.

Jobarranger Debian Package Build Tool

- Automated Debian package generation tool for Jobarranger, targeting Debian/Ubuntu distributions.
- Shell-scripted Docker-based build pipeline that compiles source and produces distributable .deb files with a single versioned command, supporting multi-distro release workflows.

Ansible-Based Test Environment Provisioner

- Automated infrastructure provisioning tool using Ansible playbooks to prepare remote Linux servers for Jobarranger integration testing.
- Handles end-to-end setup including Docker, EPEL, PHP, CentOS dependencies, and Jobarranger installation via SSH key-based access across multiple target hosts.

Windows SSH Key Deployment Tool

- Go-based CLI utility that replicates the Unix ssh-copy-id workflow on Windows, copying public keys directly to a remote host's administrators_authorized_keys for password less SSH access.
- Supports configurable port, custom public key path, custom remote target path, and a force mode to bypass key existence checks — filling a native tooling gap in Windows SSH environments.

Full-Stack Scheduling Web App

- A team-built appointment scheduling system developed over 2 months (Dec 2022 – Feb 2023) with a 6-person engineering team.

- Implemented a Spring Boot REST backend paired with an Angular/TypeScript frontend, delivering a complete booking and scheduling workflow with SCSS-styled responsive UI.

EDUCATION

Bachelor of Science in Information Technology (In Progress)

European International University, Paris

Expected Year: 08/2026

Bachelor of Computer Science | 01/2018 – 03/2020

University of Computer Studies, Loikaw

CERTIFICATIONS

- Golang (Intermediate) Certificate | HackerRank | 06/2025
- Golang Developer Certificate | Daiwa Institute of Research | 03/2023

LANGUAGES

Burmese (Native)

English (Professional)
